

Red Wave™

Patent Pending

It doesn't get any easier than this!

After purchasing numerous **Red Wave™** Blankets, he comments "I love 'em!" I asked him why:

- "They are lightweight and convenient.
- 1 person can carry it. [1 Red Wave equals 5 regular blankets!]
- Saves a ton on labor. The second time you move them, they pay for themselves, because 3 guys can do it instead of 7 (with regular blankets).
- They are great in the wind - regular blankets fly all over and with Red Wave™ you just roll it out (don't have to pick it up to place it). Two guys unroll while one guy comes behind both of them throwing weights down. You use 1/2 the weights with Red Wave™ as you do with regular blankets.
- Red Waves™ don't hold water so you don't get the sheets of ice like you do with regular blankets. Plus, regular blankets that have frozen water inside are heavy and impossible to roll or fold.
- Regular blankets are such a pain. Red Waves™ are much easier to work with.
- They're great!"

Red Wave™
