

Size: 33'L x 10' W x 7' H  
Power: One 20 amp circuit  
Weigh: 375 lbs.  
Limit: 200 lbs. Per person

**THE SAFETY OF CHILDREN USING THE BUNGEE RUN DEPENDS ON YOU!**

**Our inflatable units are well engineered and designed for the pleasure and safety of children, but your attention to the following safety warning are important.**

1. All persons should remove shoes, eyeglasses, and all sharp objects or apparel before beginning their run.
2. Children should not be allowed on the unit without adult supervision.
3. Unload runners immediately if wind exceeds 25MPH.
4. Use common sense when putting on the harness, Anyone too small for the harness probably shouldn't attempt the run.
5. Hang a bell, baton or ribbon at the end to add to the fun!

**PROBLEMS:** Should the unit begin to deflate:

1. Unload runners; there is no clause for alarm
2. If the motor has stopped, check cord connection at the outlet and on the blower. Remember only one 100-foot cord and nothing else on outlet that the blower.
1. If the motor continues to run, check the tube on the back of the unit to see if it is snugly attached to the blower; then plug blower back in.
